Dear Hiring Team,

I'm reaching out about the Software Engineer opening on your team. I've spent the last several years building backend services in Go and TypeScript, most recently leading a small team responsible for payments infrastructure at a Series B startup. I'm drawn to roles where I can own a service end to end, and I'd welcome the chance to bring that experience to your engineering org.

I've attached my resume and would be glad to speak further.

Best,

Jordan Rivera
