SUMMARY

Backend engineer with 8 years of experience building distributed systems in Go and TypeScript. Led a 4-person team shipping payments infrastructure at a Series B fintech startup. Comfortable owning services end to end: design, on-call, and mentoring.

EXPERIENCE

Senior Software Engineer, Fintech Startup (fictional) -- 2021-Present

- Led redesign of the payment-ledger service, cutting reconciliation errors by an estimated 90% (dummy figure for testing).
- Managed a team of 4 engineers; ran on-call rotation for 12 services.
- Migrated a monolith's billing module to a Go microservice.

Software Engineer, Data Platform Co (fictional) -- 2018-2021

- Built ETL pipelines processing ~2TB/day of event data.
- Wrote internal tooling in TypeScript/Node for schema migrations.

Junior Engineer, DevTools Inc (fictional) -- 2016-2018

- Contributed to an internal CI system used by ~50 engineers.

EDUCATION

B.S. Computer Science, State University (fictional) -- 2016

SKILLS

Go, TypeScript, Python, PostgreSQL, Kafka, Kubernetes, AWS
